## STANDARD RECOGNITION MATERIAL

Four things have been done so that Recognition Material prepared for the U. S. Fleet by the Navy Department may be used both easily and flexibly.

1. All material is issued on standard-size pages—6 by 10 inches.
2. Manuals on each fleet or air force, together with all supplementary material, are issued in filing boxes or between stiff covers.
3. The manuals are made up either as loose-leaf pages, or as one or more small booklets covering specific units or types.
4. The Task Binder—loose-leaf ring type—has been provided, along with blank separators for indexing.

The Task Binder is designed as a permanent, protective holder for recognition material taken from separate manuals and required for a certain operating area. Contents of manuals not needed for such operations may be left in their original covers for future use. In the Task Binder, material may be arranged in any way to meet individual requirements.

Following is a list of manuals now available in standard size:

Series 4155016  
RESTRICTED

**ONI 54 SERIES**  
**U. S. NAVAL VESSELS**

1. The O. N. I. 54 Series has passed through many transitions as a result of wartime conditions. First published as O. N. I. 54, Silhouettes of U. S. Naval Ships, the manual has since been issued as O. N. I. 54-R, U. S. Naval Ships and Aircraft, in the standard O. N. I. 6 x 10 size for use in U. S. Navy Task Binders. The continued appearance of new ships, and reconstruction of older vessels, necessitated the issue of this manual in a series of supplements. As data became available in increasing quantities, collation of the material has imposed a considerable burden upon the user.

2. The advanced status of the naval building program now makes it possible to reprint this publication in more convenient form and the greater part of the manual will henceforth be issued in a series of "type pamphlets" which will be issued as reconstruction and the completion of new ships require. The process of replacement of material already issued will necessarily be a gradual one. Material covering types will be reissued in pamphlet form as it becomes available and these pamphlets may be substituted

by holders of O. N. I. 54-R for the loose-leaf sheets covering these types.

3. O. N. I. 54-R was initially issued under the title "U. S. Naval Ships and Aircraft." Since coverage on U. S. aircraft in standard 6 x 10 size is now available in other publications, an aircraft section will not be included in the O. N. I. 54 Series as reissued. The O. N. I. 54 Series illustrates all types of seagoing vessels on the Navy list.

4. The O. N. I. 54 Series is issued as RESTRICTED. Subject to the limitations implicit in this classification, commanding officers may exercise such latitude in the circulation of this publication as to assure familiarity with the appearance of ships of the U. S. Navy on the part of personnel under their command.

R. E. SCHUIRMANN,  
Rear Admiral, U. S. Navy,  
Director of Naval Intelligence.

## U. S. BATTLESHIPS

ONI 54-I • RESTRICTED

The appearance of U. S. Battleships, since the outbreak of the war, has evolved into a predominantly one-stack design. Although similar in general outline, these one-stackers may be differentiated by their armament dispositions and hull lines. Of the two stack BB's, COLORADO alone is likely to undergo radical alteration of appearance.
